

SECTORS PRESENT IN GALIFOREST 2010

- Forestry Machinery
- Timber Production
- Forestry Services
- Transformation and Services Companies
- First Transformation Industry
- Other Forest Uses
- Biomass and other Renewable Energies
- Timber Transportation and All Terrain Vehicles
- Fight Against Forest Fires: Prevention and Extinction
- Associations and Vertical Institutions
- Training and Research
- Institutions

International Forestry Monographic Show for Southern Europe

AN EXHIBITION HELD IN A REAL WORK SPACE WITH THE BEST INFRASTRUCTURES AND SERVICES

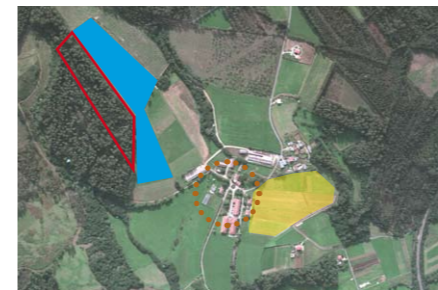

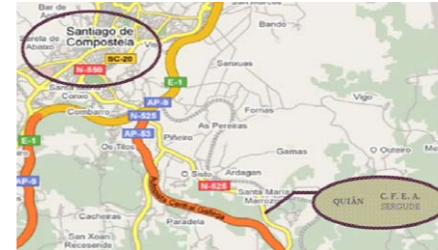

Galiforest 2010 will be held in the Agro-forest Training Centre of Sergude, very close to the International Trade Fair of Galicia showground and just 15 kilometres away from Santiago de Compostela and its International Airport.

This special location will favour the development of the exhibition in a real work space, where live exhibitions will take place. And, at the same time it will be held very close to the capital city of Galicia, which guarantees good communications both with the rest of the region, and also with the rest of Spain and Portugal, as well as the wide accommodation and leisure offer available in Santiago de Compostela.

Sergude has excellent infrastructures since they are easily accessible from the motorway for both exhibitors (heavy machinery) and visitors. The entrance way to the exhibition centre is paved, it has parking space, facilities where technical meetings and congresses can be held, restaurant, different services for exhibitors and visitors, outdoor exhibition space with annex forest mass areas for machinery exhibitions. In addition, there are experimental crops in spaces that complement the exhibition. This plot of land covers more than 96 hectares.

A wide variety of services will be available – catering, mobile bathrooms, security, shuttle bus service or safety work material – for exhibitors and visitors, offering the same quality as the exhibition itself.

In addition to these excellent features, it is worth mentioning the fact that it is located in Galicia, the first Spanish forestry producer and the region where the main manufacturers and importers of machinery and forest owners are located.

GALIFOREST 2010, THE SPECIALISED FORESTRY MONOGRAPHIC SHOW DEMANDED IN THE IBERIAN PENINSULA

The **International Trade Fair of Galicia**, institution that supports the Galician primary sector, organises the first edition of an exhibition exclusively dedicated to the forestry sector.

Galiforest 2010, International Forestry Monographic Show for Southern Europe, opens with the aim of meeting the needs of the forestry sector in the South of Europe, and especially in the Iberian Peninsula. Therefore it will become the business centre and showcase of innovations so long demanded by the sector.

In addition, it is committed to become a platform that contributes to opening new international markets, through the participation of **buyers and importers from Europe and abroad**.

A **professional, international and biennial exhibition, held in the forest, offering live exhibitions within the exhibiting area** are the basic features of a show that guarantees profitability and objective fulfilment for all exhibitors.

AN APPEALING ACTIVITY PROGRAMME THAT WILL GIVE ADDED VALUE TO THE EXHIBITION

Very interesting technical activities are being designed as a complement for the wide and appealing exhibiting offer of the show.

- **Permanent Machinery Exhibitions.**
- **Power Saw Competitions and others**
- **Business Meetings**, that will gather offer and demand, through previously arranged meetings. The aim of this activity is promoting business exchange taking into account the different interests and commercial strategies of the exhibiting companies at Galiforest 2010.
- **Timber Auctions.**
- **Forestry Congress** where different aspects of the sector will be discussed.
- **Other Technical Meetings** featuring the most current and interesting issues for forestry professionals

SHOWCASE OF INNOVATIONS

Galiforest 2010 is committed to become a tool for the promotion of technological improvements and innovation.

It will be a showcase for the latest innovations in forestry, fire prevention and extinction, first transformation and biomass use, which is a very interesting business opportunity.

In addition, the possibility to exhibit, in situ, how machinery works will allow visitors to check its advantages and favour quicker decisions of potential buyers.

The innovations intended to improve respect towards the environment will play a special role in the show, in an attempt to find a sustainable management of forests and habitat preservation
